SUMMARY

Full-Stack Developer focused on back-end engineering, APIs and applied AI. At Humana AI, I build React/TypeScript interfaces, Node.js/Next.js APIs and integrations with LLMs, agents and tools. Experienced in Python, Django, FastAPI, relational databases, automated testing and production support. Graduate in Systems Analysis and Development, with an emphasis on reliable delivery and collaboration.

TECHNICAL SKILLS

Python | JavaScript | TypeScript | React | Next.js | Node.js | AdonisJS | Django | FastAPI | SQL | PostgreSQL | MySQL | HTML5 | CSS3 | Git | Docker | GitHub Actions | Pytest | Vitest | Playwright | REST APIs | JWT | AI Agents | LLM Integrations | MCP | RAG | Fine-tuning | Spec-Driven Development

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Humana AI | Mar 2026 - Present | Remote

- Build AI platform features, from initial design through production delivery.
- Develop Node.js/Next.js APIs, React/TypeScript interfaces, agents and LLM integrations.
- Write Vitest and Playwright tests; support production workflows and SQL queries.

Full-Stack Developer | Appen Seguros | Nov 2025 - Mar 2026 | Hybrid

- Automated billing and operational workflows with Python and health insurance integrations.
- Built Node.js/AdonisJS REST APIs, React/TypeScript interfaces and legacy system integrations.
- Supported production systems, investigated failures and maintained relational databases.

Full-Stack Developer | Freelance | May 2025 - Nov 2025 | Remote

- Built a barbershop management system with Django, Python, JavaScript and PostgreSQL.
- Delivered scheduling, customers, services, finances and SMS notifications; deployed and maintained the application.

PREVIOUS EXPERIENCE

Administrative Assistant | Hospital e Maternidade Santa Joana | Jan 2021 - May 2025

Hospital Messenger | Pro Matre Paulista | Mar 2020 - Dec 2020

Apprentice | Santa Rita Industrial e Comercial | Jun 2018 - Jun 2019

Hospital administration routines, SoulMV ERP and health insurance requests.

SELECTED PROJECTS

Barbershop Scheduling System

Technologies: Django, Python, PostgreSQL, JavaScript, SMSDev API, Railway.

Description: Built for a real client, with a calendar, customer and service management, financial reports and SMS notifications. Includes 250 automated tests and a GitHub Actions CI/CD pipeline.

[View project](#)

First API - Task Manager

Technologies: Python, FastAPI, SQLAlchemy, JWT, SQLite, JavaScript, Docker, Pytest.

Description: Asynchronous API with JWT authentication, user-isolated task CRUD, Swagger UI documentation, a responsive interface and Docker Compose setup.
